

# On Campus Flu Vaccination Clinic

HEALTH HERO FLORIDA

You Keep Them Learning, We Keep Them Healthy

Our partnership begins here.

# Partnership Summary

To keep your students learning, we need to keep them healthy and in school. The success of our program starts with delivering a successful vaccination clinic with a well-executed plan. Here is a helpful summary of what you can expect day of clinic along with pre and post clinic.

## Pre-Clinic:

01

### Select Dates

The Health Hero Florida Team will coordinate with you to select an appropriate clinic date. Due to the current impacts of COVID-19, we understand the challenges the new school year will bring and will remain flexible on services and clinic dates for the 2020-2021 season.

02

### Help Would Be Great!

Health Hero Florida would love to have your help! Your school will need to dedicate an Immunization Clinic Champion to serve as our main point of contact for the program. We will also accept school appointed volunteers for day of clinic activities, but they must be pre-approved prior to clinics.

03

### Check the Mail

Health Hero Florida will mail you the Parent Consent Forms along with a Communications Toolkit with resources on promoting the program.

04

### Send Forms Home

Determine a way to send the Parent Consent Forms home. For example, you can send the Consent Forms home in your Back To School Folders. Then ask your teachers to collect these forms daily and pass the completed consent forms to the Clinic Champion and/or the school nurse.

## Day-Of:

Once on-site, we have several protocols we follow to ensure students are vaccinated as safely and efficiently as possible.

05

### Final Number of Participants

Health Hero Florida will call 2 weeks prior to clinics to acquire student counts and will continue to call to get updates until 2 days prior to your clinic. The school responsibility will be to secure a designated room for immunization clinics with 1 small trash can, at least 1 table and 4-5 chairs.

06

### Our Arrival

We will bring the vaccine(s), supplies, and collect the Parent Consent Forms. Once the clinic begins, someone will be checking forms and filling out immunization paperwork for the students to take home.

07

### Timing

The number of student participants with parental consent and following clinic protocols will determine how long we are on site.

## Post-Clinic:

08

### Follow Up

Following the clinic, we will work quickly to upload all information into Florida SHOTS. We will also send the school nurse a password-secure list of the students who participated and what vaccines they received.

# Form Distribution

We need your help in ensuring our Parent Consent Forms are distributed in a timely manner once school is back in session, and parents/students are clear on what action is needed from them.

## Two Recommended Options:

### Back-to-School Packets

Prior to the return of the school year, include the Immunization Parent Consent Forms in your orientation back-to-school packets.

### Teacher Distribution

Once the school year has returned, ask your teachers to distribute the forms to their students.

“ I have been able to see a decrease in the absences due to flu because of the clinics. Each clinic we have held has been conducted without any problems. I do feel that you would benefit greatly from their services and feel that you will be impressed with their professionalism.”

**KAREN KEEL, SCHOOL NURSE**

COOSA COUNTY SCHOOLS

# We are so excited you chose us.

## Safe. Efficient. No cost.

We are so excited you chose Health Hero Florida to lead your school in offering on-site immunizations for your students. Vaccinations help students and teachers stay healthy to ensure a proper education while creating happy parents who can stay at work!
